Reading and Writing – ٤٠ points

Answer the questions that follow the passage.

1

Fruits and vegetables are very important for keeping a healthy lifestyle. In addition, they taste great and add colour to any meal.

2

Many people do not know how much fruits and vegetables can help their bodies. When you eat vegetables and fruits you give your body **plenty** of vitamins and minerals. These are very important for your body to work properly. For example, many fruits are naturally high in vitamin C and potassium. They are also a good source of water because they have much juice in them.

3

Fruits and vegetables are generally low in fat and calories. They also do not contain preservatives (مواد حافظة) or artificial colours and flavouring. So if you eat fruits and vegetables instead of eating foods that are full of fat and added sugars, like pizza and sweets, you will be able to keep a healthy weight. Remember that being overweight might cause you serious health problems.

4

So what type of fruits and vegetables should you eat and how much? In fact, any type is good for your health. People are advised to eat five portions of fruits and vegetables a day. Each portion is about 80 grams of fresh food. But if you drink fresh juice, it can only count as one portion even if you drink a lot of it. For example, a medium apple, a medium banana, or three table-spoons of raisins (عنب مجفف) counts as one portion each. All people are recommended to keep these rules in mind and act upon them if they wish to pursue a healthy life.

1. How many positive things about fruits and vegetables are mentioned in paragraph

1? Write the number. Answer: _____ things.

(٢ points)
